DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

2. Applicant's submission filed on April 30, 2008 has been entered and made of record.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 4/30/2008 was filed after the mailing date of the Notice of Allowance on 3/28/2008. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

4. Claims 1 – 10, 12 – 29, 31, 32 are allowed and renumbered as 1 – 30.

5. The following is an examiner's statement of reasons for allowance: The Applicant submitted prior arts Chen (Patent 4,970,504), Mundwiller et al. (Patent 6,178,173), Lineman et al. (Publication 20030065942) and Cohen (Publication 20040139004).

Chen discloses "a security system for controlling access to property, with its password varying with time".

Mundwiller discloses "a method for communicating pre-connect information between a calling endpoint and a called endpoint in an Integrated Service Digital Network (ISDN) system".

Lineman discloses “electronically creating a security policy document, which contains appropriate controls required to enforce the security policy on various computing platforms. The disclosed software communicates a set of security policies, standards and guidelines that must be understood by people to the various individuals of a company via a software program”.

Cohen discloses “a method of transacting electronic commerce comprising the steps of: establishing a secure Internet connection between a special purpose client and a central server, using the special purpose client to register a user and to obtain credit card details from the user, the user’s credit card having an issuer remote from the central server, obtaining request over the Internet from the user to the central server for a disposable credit card, establishing a secure connection between the central server and a central bank by a closed network, obtaining funds authority from the central bank by the closed network, and supplying the user with a disposable credit card over the Internet after funds authority has been received”.

However, these prior arts taken independently or in combination, do not disclose, teach or suggest “instructions to communicate a new security policy to a plurality of security engines, wherein at least one of the plurality of security engines implements an antivirus service, wherein each of the plurality of security engine is configured to replace an existing security policy with the new security policy, and wherein a new set of rules and/or data associated with the new policy is provided to each security engine; and

Instructions to communicate an indication of each security engine’s readiness to implement the new security policy, wherein each of the plurality of security engines returns a value signifying whether it has processed the new set of rules and/or data received to indicate readiness to implement the new security policy”.

Thus, the present invention further provides “an event manager that receives events and other information from multiple sources, such as security engines (antivirus engines, firewall engines and intrusion detection engines) and other computing system. The event manager communicates even information communicates event information received form a particular source to one or more security engines that might use the information to improve the level of security provided for the computing system.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
